EDUCATION

• Institut Polytechnique de Paris (IPP)

Since 11/2023 – Paris, France

Preserving graph performance in an exogenously perturbed environment - Expected graduation date: **Dec.2026**

• École Centrale de Nantes (ECN)

09/2021 – 09/2023 – Nantes, France

Generalist Engineer Degree (MSc)
- Applied Mathematics Options

• Université de Picardie Jules Verne (UPJV)

09/2017 – 07/2021 – Amiens, France

Bachelor of Science (BSc), Optimization

CORE SKILLS

Python/SQL, GCP/
AppScripts (Google Apps Script),
Machine Learning/Deep Learning/
PyTorch, predictive & optimization
models, scikit-learn/model evaluation,
Data Visualization/Power BI,
process automation/data pipelines,
LLMs/Generative AI/model APIs

LANGUAGES

• Chinese: Native language

• English: Fluent (GRE 326)

• French: Fluent (DALF C1)

INTERESTS & STRENGTHS

Teamwork • Autonomy • Adaptability

📄 Seeking a permanent position (CDI) from October 2026

Target: Data Scientist – Data & AI / CSO

Data Scientist | AI Engineer | Algorithm Engineer

INDUSTRIAL EXPERIENCE

2025

Shanghai,
CHINA

Internship – Algorithm Engineer (Huawei)

08/2025 – 11/2025

- Developed a predictive Deep Learning model using multimodal contrastive learning on 3D point clouds and channel data.
- Designed an optimization model for non-contiguous resource allocation and evaluated it against the RIV reference approach.

2023

Cambridge,
UK

Internship – Biostatistics Researcher Intern (EMBL-EBI)

04/2023 – 09/2023

- Automated a Python/R/Bash data pipeline for simulation, cluster execution and benchmarking while contributing to a maximum-likelihood algorithm for up to 500,000 genomes.
- Analyzed and visualized topological accuracy, likelihood, runtime and memory over 10 replicates per configuration, demonstrating a speedup above 100x.

2022

Paris,
France

Internship – Data Engineer (IFPEN)

04/2022 – 08/2022

- Modeled and queried public-transport data in SQL, optimized queries and built a KPI dashboard with clear data visualizations.
- Compared Java/MATSim simulations with observations and applied SARIMAX/NeuralProphet forecasting to analyze drivers and correct statistics.

2021

Nantes,
France
remote

Project - Data Analyst (Tencent)

11/2021 – 01/2022

- Clarified business needs for churn analysis with stakeholders and built a scikit-learn classifier for retention and win-back.
- Evaluated it with ROC-AUC and tuned hyperparameters using GridSearchCV.

SCIENTIFIC RESEARCH EXPERIENCE

Selected Publications (For more publications, please visit my [Google Scholar profile](#).)

CNN text classification method based on simulated annealing method (ACM International Conference Proceeding Series)

Rate variation and recurrent sequence errors in pandemic-scale phylogenetics (Nature Methods)

Multi-task learning for Bayesian Networks

Oct. 2022 – Apr. 2023

Nantes, France – Nantes Digital Science Laboratory (LS2N)

Keywords: C++, Bayesian Networks, Transfer learning

Extreme value theory with environmental applications

Oct. 2022 – Apr. 2023

Nantes, France – École Centrale de Nantes (ECN)

Keywords: Statistical Modeling, MATLAB

LLM-related Research

Since 2025

- Developed **EvoHGS**, an LLM framework for VRP optimization integrating the Gemini model API; its fine-tuned 8B model outperformed GPT-5 nano (estimated 2B parameters) and achieved SOTA results.
- Adapted MiniMind into an end-to-end workflow for LLM training and evaluation.

Keywords: C++, Reinforcement fine-tuning (RFT), Supervised Fine-Tuning, LoRA, GRPO
